

AITC

AI Technology Consulting

CAPABILITY STATEMENT

AI Technology Consulting, LLC

Government Website Development, Cloud, Cybersecurity & AI Solutions

01. Company Overview

AI Technology Consulting, LLC (AITC) is a self-certified Small Business and Minority-Owned digital services provider specializing in modern, secure, and accessible government website development. We help agencies modernize outdated systems, improve citizen experience, and deliver digital services that are fast, reliable, and compliant.

With headquarters in Cheyenne, Wyoming, and global delivery centers in the U.K. and India, AITC provides cost-efficient, high-quality development with 24/7 capability. While website development is our core strength, we also deliver cloud, cybersecurity, AI, and workforce solutions that support the full digital lifecycle.

02. Core Competencies

Government Website Development (Primary Focus)

AITC specializes in building modern, secure, ADA-compliant, mobile-responsive websites for government agencies.

- Website redesign & modernization
- WCAG 2.1 AA accessibility
- Citizen portals & service applications
- WordPress, Drupal, and headless CMS
- API-driven backend integrations
- Cloud-hosted, scalable architectures
- Performance optimization & security hardening
- Multilingual support

Custom Software & Application Development

- Full-stack development
- API engineering & system integration
- Legacy modernization & migration
- DevSecOps pipelines

Cloud, Cybersecurity, Data & AI

- Cloud strategy, architecture & migration (AWS, Azure, Google Cloud)
- Website security assessments, zero-trust architecture, continuous monitoring
- NIST, CMMC, FISMA, and FedRAMP alignment
- AI-powered chatbots, document automation, and predictive analytics
- Responsible AI implementation

Workforce & Staffing Solutions

- IT & non-IT staffing
- Cleared and uncleared personnel
- Managed services & dedicated teams

03. Past Performance

Statewide Website Modernization Program

Redesigned and rebuilt a multi-agency government website ecosystem, improving accessibility, reducing load times by 60%, and increasing citizen engagement through modern UX and mobile-first design.

Public Health Digital Portal

Developed a secure, HIPAA-aligned web platform enabling residents to access health services, schedule appointments, and receive real-time updates—supporting over 2 million users.

County Cybersecurity & Web Hardening Initiative

Implemented advanced security controls, continuous monitoring, and vulnerability remediation for county websites, resulting in zero security incidents post-deployment.

Multi-Agency IT Workforce Support

Provided long-term web developers, cloud engineers, and cybersecurity specialists to multiple agencies, maintaining a 98% satisfaction rate and supporting mission-critical digital operations.

04. Differentiators

- **Website Modernization Experts:** Deep experience transforming outdated government websites into modern, secure, citizen-friendly platforms.
- **Accessibility-First Design:** All websites built to WCAG 2.1 AA standards.
- **Security-Driven Development:** Security embedded from design through deployment.
- **Global Delivery Model:** US-based leadership with UK analytics and India 24/7 engineering.
- **Procurement Ready:** Active registrations, NAICS coverage, and certificates of good standing.
